Subject: Spirit of Sacramento

Hi Chris,

We received your Request for Federal Action letter, which requires a signature from a representative from our Office. I was under the impression, the series of events would have the EPA receiving the Spirit from the Coast Guard and then we received it from you, after it was decontaminated. Our concern is being charged with the costs of decontamination, as the agency requesting the services. Can you advise on how this process works and if this is the standard procedure for these types of events?

Thanks again for all of your help,

John
